

Saikrishna P

AI / GenAI Engineer | AI Product Engineer | Full-Stack & Cloud | CTO & Founder

docodoco3200@gmail.com • saikrishna-portfolio-vert.vercel.app • github.com/Savage4696 • krishcompanies.in

PROFESSIONAL SUMMARY

AI/GenAI engineer and technical founder with ~7 years of hands-on software engineering exposure, including freelance/client delivery, and ~4 years of hands-on AI/ML and Generative AI work. Builds production-oriented products end-to-end across frontend, backend, databases, ML/LLMs, RAG, agentic workflows, cloud infrastructure and security. CTO & Co-founder of NeuroQoreX and Founder of Krish Companies, with experience delivering proprietary client/startup systems, live AI applications, and a computational Digital Neuro-Twin POC showcased at BioAsia 2026. Strong in Python, MERN, PostgreSQL, MongoDB, vector databases, TensorFlow, PyTorch, AWS, GCP and Azure.

CORE TECHNICAL SKILLS

AI / GenAI:	LLMs, Generative AI, RAG, RLHF, Agentic AI, LangChain, Multimodal AI, AI Product Development, Model Deployment, ML
Programming:	Python, JavaScript, TypeScript, React, Node.js, FastAPI
ML / Data:	TensorFlow, PyTorch, Gradient Descent, AutoML, MLOps, Embeddings, Vector Databases, PostgreSQL, MongoDB, Oracle Database
Cloud / DevOps:	AWS, GCP, Azure, S3, Docker, Kubernetes, Cloud Deployment, Production Infrastructure
Security:	IAM, Role-Based Access Control (RBAC), Authentication/Authorization, Security Policies, ISO-Aligned Security Practices
Engineering:	Full-Stack Architecture, REST APIs, Database Design, Scalable Systems, Production Deployment, Technical Architecture

PROFESSIONAL EXPERIENCE

CTO & Co-Founder NeuroQoreX	Feb 2026 – Present
- Lead technical development of a computational Digital Neuro-Twin platform for early neurological risk detection and therapy design. - Work across AI/ML architecture, biomarker-focused modeling, product engineering and system development. - Contributed to a proprietary computational POC showcased at BioAsia 2026; detailed implementation remains confidential.	
Founder (Software Development & IT Consulting) Krish Companies	Aug 2025 – Present
- Founded an MSME-registered software development and IT consulting company delivering custom software, AI/ML, GenAI, agentic workflows, cloud and database solutions. - Own end-to-end delivery across discovery, architecture, frontend, backend, databases, AI/ML, cloud deployment and production security. - Delivered client systems and maintains live demonstrations where permitted; client repositories remain private due to confidentiality.	
Founder & CEO Stealth Startup	Aug 2025 – Present
Building an AI-powered financial intelligence platform combining intelligent research, financial data workflows and AI-driven analysis.	
Full-Stack Developer Firebase Studio	Jan 2025 – Present
Build AI-enabled B2B/B2C SaaS applications across frontend, backend and product workflows.	
GenAI Trainee SpectoV	Jul 2025 – Nov 2025
- Worked with a startup focused on AI, AR and VR technologies. - Implemented and applied Retrieval-Augmented Generation (RAG) and Reinforcement Learning from Human Feedback (RLHF) techniques in GenAI applications.	
Automation Specialist ngn	Feb 2025 – Jul 2025
Created custom automation solutions for workflow and operational requirements.	

Foreign Exchange Trader | FundedNext

Apr 2024 – Jul 2025

- Applied quantitative and risk-management approaches to FX trading across EUR/USD, GBP/USD and XAU/USD, including scalping strategies.

Android Developer | Android Studio Solutions

Jul 2020 – Aug 2022

- Built custom Android software using AOSP, including work for realme X3.

SELECTED PROJECTS

- Eva AI** (Multimodal LLM Platform): Multimodal AI application combining text generation, image capabilities, neural TTS, live transcription/voice, code generation, web research and assistant workflows.
- Financial Agentic Research Assistant** (Agentic Financial Research Workflow): Combines LLM reasoning, retrieval/RAG, market information and structured research outputs.
- Trading Signal Engine** (Quantitative Trading System): Focused on real-time signals, technical indicators and backtesting.
- Hospital Management & Clinical Intelligence Platform** (Healthcare Platform): Live full-stack healthcare platform with RBAC, role-specific workflows, AI integration, diagnostic reports, drug warnings, prescriptions, inventory and discharge management.

CERTIFICATIONS & PROFESSIONAL LEARNING

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional: 74% (68% pass)
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional: 84% (68% pass)
- Stanford Online: Machine Learning Specialization (Completed)
- Stanford Online: Code in Place / CS106A Programming Methodology (Completed)
- Microsoft / LinkedIn: Azure AI Essentials
- McKinsey Forward Program (Selected participant)
- Gen AI Academy 2.0 (Hack2skill)

EDUCATION

B.Com (Computer Applications) | Avinash College of Commerce, India

2023 – 2026

Stanford Online | Code in Place / CS106A Programming Methodology

2026

Stanford Online | Machine Learning Specialization

Completed

PORTFOLIO & REFERENCES

Live portfolio and selected project demos available at portfolio URL. Proprietary client/startup source code is private; technical walkthroughs, architecture explanations and client references can be provided where permitted.
